# CANADA'S TOUGHEST GARAGE FLOOR COATINGS

VERSATILE AND ATTRACTIVE INDUSTRIAL STRENGTH COMMERCIAL, RETAIL, AND VEHICULAR FLOOR COATINGS

DURABLE

Flexstone's rugged multi-layered floor coating systems are designed for heavy traffic (vehicular and pedestrian) and harsh conditions. The system is easy to clean/maintain and is chemical resistant.

VERSATILE

Flexstone flooring is by no means limited to interior garage or showroom floors. The system can be used on industrial floors, kitchens, driveways, exterior walkways and almost any other concrete sealing application.

ATTRACTIVE

Flexstone provides premium solutions to dilapidated concrete surfaces. Our custom blends of decorative acrylic chips provide just the right amount of pop to make your garage floor or showroom a stunning focal point.

Flexstone is the premium garage, showroom, commercial, industrial, and retail flooring system. Beyond its inherent attractive finish options, the four-ply reinforced Flexstone system is easy to clean and maintain and has been formulated to last under heavy duress and harsh weather conditions.

The Flexstone flooring system is composed of a primer-sealer that seals any trapped moisture and ensures a permanent bond to concrete, a urethane colour coat, fire-retardant decorative flakes and an industry-leading next-generation poly-aspartic clear coat that is installed thick and lasts indefinitely. In short, Flexstone is Canada's premier flooring system.
